## DETAILED ACTION

### *Reasons For Allowance*

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to an input equipment with sensed movement feedback, comprising a housing; a pressure sensor pad being disposed on a top of the housing, a rolling ball, being disposed under the sensor pad in the housing, at least one driver, being disposed on one side of the rolling ball and in contact with the surface of the rolling ball; and a control circuit, being disposed in the housing and electrically connected to the pressure sensor pad and driver respectively. The combination of the prior art of Kiljander et al. (US 6,480,185) and Chan (US 6,359,611) show a similar invention, however, they fail to teach the pressure sensor pad, being disposed on a through hole at the top of the housing, and having a through hole at the center thereof, such that when said sensor pad being pressed by a pressing force, the sensor pad will produce a signal according to the pressure and direction of the pressing force and transmit the signal to the control circuit, the control circuit will then produce a rolling signal depending on the signal and transmit the rolling signal to the driver, activating the driver to move the rolling ball as claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
